

Project Manager

Education

4 Year Degree or Higher with some exceptions, a technical background is preferred.

Position Description

Project managers perform much better when they have a technical background and can understand the technical details of the product and the tasks involved in an implementation. For this reason, new project managers are required to complete 1 full project as a technical analyst prior to assuming the responsibilities of managing a project. *Programming language in SQL is required.* See the Technical Analyst Job Description for details on what skills are required in that role. Some allowances will be made for project managers in their tour of duty as an analyst.

Technical Skills

Project managers perform much better when they have a technical background and can understand the technical details of the product and the tasks involved in an implementation. For this reason, new project managers are required to complete 1 full project as a technical analyst prior to assuming the responsibilities of managing a project. See the Technical Analyst Job Description for details on what skills are required in that role. Some allowances will be made for project managers in their tour of duty as an analyst.

Other Skills

Strong organizational skills required. Candidates must have excellent time management, able to juggle many projects at once. Must have strong written and verbal communication skills, writing sample must be provided.
