

## **Project Manager – Healthcare Technology**

### **Job Description**

Sentry Data Systems, Inc. is seeking highly qualified Project Managers to perform a lead role in managing the implementation of its SaaS products and services. The ideal candidate will be a collaborative leader with excellent communication and project management skills and significant experience working with hospital technology and business executives to install or implement technology-related products and/or services. The PM will build long-term relationships with hospital clients and manage the contractual and financial responsibilities of project management for our customers. The Project Manager must maintain complete control of project schedule, budget and risk issues. Facilitate timely decisions to maintain project schedule and budget. Provide management with regular project updates, maintain trusting relationships, identify project risks early and assist by providing prudent and timely recommendations for risk avoidance.

### **Minimum Qualifications**

- Excellent communication and “people” skills
- Excellent business judgment and decision making skills within a fast-paced stressful environment
- PMP Certified (or Certifiable within 90 Days)
- 4+ years of project management experience installing technology products in a hospital or large clinic delivery setting
- Previous lead project management experience with full responsibility and accountability for an implementation from Kick-off to “Go-Live”
- Working knowledge of healthcare industry data standards
- Ability to work in a team environment and effectively manage a set of supporting technical resources
- Experience managing multiple concurrent projects

### **Preferred Qualifications**

- Knowledge and experience with pharmacy, pharmaceutical or PBMs and related technologies
- Strong technical background with previous hospital or healthcare-related software development experience
- Experience managing healthcare data integration or data conversion projects
- Detailed knowledge and experience with healthcare industry data standards

### **Travel**

Approximately 10 percent domestically

### **Education**

4-Year College Degree
