

In 2005, St. John Health was in search of a 340B product that would allow us to expand out 340B program, while ensuring that we would remain compliant with the various 340B rules and regulations. We found our answer in Sentry Data Systems.

We have 12 eligible sites that are serviced by 5 retail pharmacies we own. Without the Sentrex product, we would not have been able to roll out our 340B program to the number of sites we have today.

Sentry's staff is very knowledgeable on 340B, both historically as well as on any new changes coming. We are continuously informed about updates that may affect how we operate our program, from the proposed patient definition changes to the multiple contract pharmacy discussions. Sentry is our partner, not just another vendor.

Sentry is by far the most comprehensive 340B product on the market. I wouldn't use anyone else.

Frank Ackley

St John Retail Pharmacy Director
